Intrac realizza e propone la rivoluzionaria cassa a "flusso circolare".

A differenza dei banchi cassa tradizionali, il cliente interagisce frontalmente con l'operatore cassa, sia in fase di posizionamento della merce sul nastro trasportatore che in fase di insacchettamento.

Intrac manufactures and proposes the revolutionary 'circular flow' counter.

Front interaction between customer and cashier, both while putting the goods on the conveyor belt and while bagging, distinguishes this counter from traditional ones.

Intrac réalise et propose un meuble caisse révolutionnaire avec les flux circulaire de la marchandise.

Contrairement aux meubles caisse traditionnelles, le client interagit frontalement avec l'opérateur de la caisse, soit lorsque il met la marchandise sur la bande transporteuse, soit dans la phase d'ensachage.

ROND OS148

Con questa interazione a "flusso circolare" tra cliente e operatore di cassa, si crea la configurazione più adatta ai layout con superfici contenute. Avremmo quindi dei banchi cassa allineati e compatti senza dover prevedere corridoi tra le casse adiacenti e di conseguenza un risultato di ottimizzazione della barriera casse.

Nulla è stato lasciato al caso, ogni spazio è stato studiato per offrire una soluzione ed una funzionalità di lavoro uniche nel suo genere, contenimento e funzionalità in poco spazio.

This 'circular-flow' interaction between customer and cashier creates the most suitable configurations in small-surface layouts. Counters are compact, lined and there is no need for corridors among them, with the result of an optimized check-out barrier.

Nothing is left to chance: each and every space is designed to offer a unique solution, which combines space containment and operational functionality

Cette interaction de "flux circulaire" entre le client et la caissière identifie la configuration la plus adaptée aux petites surfaces. Les meubles caisse sont donc alignés, compactés et il n'y a pas besoin de couloirs entre eux; le résultat est une optimisation de la barrière caisses. Rien n'est laissé au hasard: chaque espace a été projeté pour offrir une solution et une fonctionnalité uniques, qui harmonise économie d'espace et fonctionnalité opérative.

DESIGN & DISPLAY

Caratteristiche salienti sono la previsione di un nastro trasportatore (se motorizzata) ed una vasca di imbustamento ai lati dell'operatore di cassa.

La parte centrale è dotata di cassetto porta monete, alloggiamento scanner e stampante e supporto tastiera touch.

Nella parte centrale e fronte cliente un piano in legno che consente di poggiare i cesti della spesa.

Among its relevant features, we count the possibility to have a conveyor belt on one side, while having the basin on the other side. The central module can be provided with cash-drawer, scanner housing and supports for printer and touch-keyboard. The front part includes a wooden panel for shopping baskets rest.

Parmi ses caractéristiques principales, il y a la possibilité d'avoir un tapis roulant (au cas où il s'agit de caisse motorisée) et une cuve aux côtés de l'emplacement caissière. Le module central est doté d'un tiroir porte monnaie, le logement du scanner et de l'imprimante et le support clavier touch. La partie frontale comprend un panneau en bois pour support paniers.
